

A: The story

Project name:	Society Club for Our Useful Tomorrow
Responsible organization and person(s):	Boris Vujnović, boris.vujnovic@sih.hr , project assistant and the SYC programme coordinator Scout Association of Croatia
Introduction to the project:	Scout Association of Croatia was given new space for the purpose of implementation of scout program as well as non-formal education of children and young in order to develop their full potential to become active members of the community. For that purpose Scout Youth Club will be established with developed program for activation of young scouts and all other young members of the society.
Objectives and goals:	In first Project activity venture and rover scouts will do necessary preparations for furnishing the space (new equipment, light construction work). With this activity not only that the club venue will be put in place but young scouts will bond through joint work and acquire new skills for further volunteering. After the first phase new Scout Youth Club will be formed with developed program for first six month of activities. In the third phase first local action will be implemented, the collection of plastic plugs in partnership with Association of Leukemia and Lymphoma Croatia which will give young scouts increased awareness care for the environment and the people around.
To which extent did we meet objectives and goals:	First project activity: fine construction work (paintwork etc.) of the venue of the Scout Youth Club started in October 2017 and lasted until March 2018. 11 working activities were held with 42 in total explorers and rovers participating. The venue was completely arranged and ready for furnishing by summer 2018. Second project activity started in January 2018 and lasted until June 2018. The programme of the SYC was designed according to the formal Youth Programme of the Scout and Guide Association of Croatia. From September 2018 the activities of the SYC will be divided into 3 groups: SYCeducation, SYCoutdoors and SYCprojects. SYC education consists of a series of seminars, workshops and presentations for explorers, rovers and young scout leaders (every two weeks). SYCoutdoors are monthly held outdoors activities for rovers and explorers (this group of activities started in March 2018, photos attached). SYCprojects includes education and praxis for explorers and rovers in project application writing (mostly with community oriented projects). Regarding the international scouting, 3 groups of French scouts were welcomed and stayed in the venue. In september of 2018 the activities for venture and rover scouts started on plan. Also, the programme of our Scout Youth Club became the official part of the Zagreb Youth Center initiative with over 30 other NGOs and the local government. In october 2018, last of the the planned equipment was bought.
What did we learn from the project:	Explorers and rovers which participated in the preparation of the venue for the SYC activities have bonded and formed a new generation of scout leaders supporting the Scout association of Zagreb. For example, the Croatian National Scout Gathering was completely organized by a group of rovers, in May 2018 in Zagreb. All meetings and preparing workshops were held in the venue. We can conclude that the SYC will be the new center of scouting in Zagreb and hope that other county scout associations will open their scout youth centers. Also, the power of the SYC to attract non scouts to the venue to take part in our scout projects and activities will probably lead us to redefine our youth programme and make it more accessible for other young people.
